

THE CLAREN QUICK CHANGE LOWER SYSTEM CONSIST IN THE STUDY, SUPPLY AND INSTALLATION OF A NEW LOWER SEALER SYSTEM COMPOSED BY:

NEW MOTOR SUPPORT, NEW LEVERING SYSTEM, NEW SEALER WITH QUICK CHANGEOVER PLUG, NEW SLIDING UPPER PLATE.

#### CUSTOMER BENEFITS

This upgrade has the following advantages:

- › Quick changeover
- › Improved sealing quality
- › Easy resistor replacement
- › Long lasting
- › Decreasing of downtime

Estimated Downtime: **1 Day**

Resources: **1 Mechanical Engineer**

#### Intervention Details:

*The installed group will replace the old sealer system, will fit with the same servomotor and will be connected with the previous electrical controller of the machine. The new sealer has a new circular-shaped thermal resistance which improves the heating uniformity and which is very easy to replace. Also the sealing surface has been improved, with a smoothed tips and narrower and continuous impact profile. The new flange, levers and control cams reduce the mechanical stress on the whole group, enhancing the durability of the whole sealing system.*
